Operations

Dr. Spatola informed the Commissioner that the Covanta Coordination Meeting was held on August 17, 2005. Discussed were: 1) The production numbers for July of this year He noted that they were essentially the same as July of last year; 2) After reviewing some of the proposed drawings from the DOT for the realignment of the Routes 1&9, Covanta thought that it could pose a potential flooding problem for this site. The matter is being looked into; 3) Review of a draft security plan for the facility.

Dr. Spatola noted that a copy of the draft was provided to the Commissioners. If they had any comments on it, they should give him a call.

Dr. Spatola reported that a meeting had been held on August 11, 2005 to discuss the Route 1&9 realignment. In attendance were DOT personnel, representatives of the construction contractor, Covanta, the Authority and its consultants. One of the major items discussed was the necessity of shutting off power to the facility due to the need to relocate one of the poles that carries power in and out of the plant. He explained that it was anticipated that power would be shut off, at various times, for a total of ten days. Also discussed were security issues for when the sound wall is opened up. A discussion followed regarding the shutting off of power to the facility and the possible need to divert waste to a by-pass facility.

Mr. Neasfey provided the Commissioners with an enforcement update. He noted that there were 230 solid waste inspections conducted during the month of July.
